Sartomer Company Unveils Hydrophobic Urethane Oligomer

EXTON, Pa., January 28, 2009 – Global specialty chemicals manufacturer Sartomer Company introduces a hydrophobic urethane acrylate oligomer. CN9014 offers increased chemical resistance and enhanced dielectric properties, and is compatible with hydrophobic acrylate monomers. The oligomer offers low yellowing characteristics and will yield films that are flexible and have a low T_g .

Recommended applications include encapsulated circuit boards, coatings for highly corrosive environments, barrier coatings, sealants and adhesives.

For complete technical details, visit Sartomer's online technical library at www.sartomer.com or call the technical hotline at 800-SARTOMER.

Sartomer Company, part of Total's Chemicals branch, is a U.S.-based manufacturer of specialty chemicals. Headquartered in Exton, Pa., Sartomer provides a variety of specialty chemicals designed to enhance processing and performance characteristics in coatings, inks, elastomers, adhesives, sealants, composites, and other demanding applications. The company's product offering includes more than 700 monomers and oligomers, polybutadiene resins, styrene maleic anhydride resins and other specialty chemicals.
