**Sartomer's CN2285 Oligomer Expands Tool Set for Ink and Coating Formulators Using UV/EB-Cured Thermoforming Systems**

---

**EXTON, Pa., March 30, 2009** – Global specialty chemicals manufacturer Sartomer Company introduces CN2285 — an acrylic oligomer specifically developed for UV/EB-cure thermoforming applications. It offers formulators superior adhesion to different films, abrasion and scratch resistance, and low viscosity.

Flexographic and gravure printed consumer product packaging is an ideal application for CN2285.

For complete technical details, visit Sartomer's online technical library at [www.sartomer.com](http://www.sartomer.com) or call the technical hotline at 800-SARTOMER.

**Sartomer Company**, part of Total's Chemicals branch, is a U.S.-based manufacturer of specialty chemicals. Headquartered in Exton, Pa., Sartomer provides a variety of specialty chemicals designed to enhance processing and performance characteristics in coatings, inks, elastomers, adhesives, sealants, composites, and other demanding applications. The company's product offering includes more than 700 monomers and oligomers, polybutadiene resins, styrene maleic anhydride resins, and other specialty chemicals.
