

UV/EB Seminar

March 27 – 29th, 2012

Sartomer USA, LLC will once again be offering their UV/EB seminar to current and potential users of UV/EB chemistry. The free seminar will be held from March 27 – 29th, 2012 at the headquarters in Exton, PA.

The topics presented are suitable for attendees with all levels of experience with UV/EB chemistry. The first two days of the seminar focus on chemistry and introductory topics while the last day focuses on the advanced topics.

Any interested parties should contact James Goodrich by email at james.goodrich@sartomer.com. Invitations will be sent on a first come, first served basis.

Topics

- Introduction to chemistry
- Monomer chemistry
- Oligomer chemistry
- Photoinitiator chemistry
- UV and EB sources
 - Technical and application specific discussions
- Additives for UV/EB
- Application specific products and discussion
 - Graphic Arts
 - Adhesives
 - Wood coatings
 - Metal coatings
 - Hard coatings
- Acrylates in non-UV/EB applications
- Advanced topics
 - Adhesion
 - Light properties
 - Mechanical properties
 - Testing procedures
 - MVTR and OTR
 - Weathering
