## **Sartomer Company Increases Methacrylate Monomer, Select Oligomer Prices, Effective Jan. 15, 2007**

---

**EXTON, Pa., January 5, 2007** – Global specialty chemicals manufacturer Sartomer Company will increase the price of its methacrylate monomers and urethane acrylate oligomers effective January 15, 2007 (or as contracts allow). Increases will vary by product line as follows:

- Methacrylate monomers increase will range from 10 cents to 15 cents per pound
- Urethane acrylate oligomers will increase by 15 cents per pound

The price increase is due to the continuing escalation of key raw material costs that are on a tight supply situation. The increases will impact product shipments from the United States to the Americas, Europe, and Asia.

Sartomer's monomers, oligomers, and photoinitiators are used as raw materials for ultraviolet and electron beam (UV/EB)-cure coatings, adhesives, inks, electronics, and other applications.

**Sartomer Company**, part of Total's Chemicals branch, is a U.S.-based manufacturer of specialty chemicals. Headquartered in Exton, Pa., Sartomer provides a variety of specialty chemicals designed to enhance processing and performance characteristics in coatings, inks, elastomers, adhesives, sealants, composites, and other demanding applications. The company's product offering includes more than 620 monomers and oligomers, photoinitiators, polybutadiene resins, styrene maleic anhydride resins, hydrocarbon resins, and other specialty chemicals.
