Sartomer Enhances Online Technical Library
Adds advanced Product Selection Guide and easy access to New Product Alerts

EXTON, Pa., March 23, 2007 – Sartomer announces enhanced features to its online technical library, including improved search functionality for its Product Selection Guide and easier access to its growing archive of New Product Alerts.

The improved Product Selection Guide offers new multiple search criteria for preferred features, quantitative properties like specific gravity and viscosity, and applications. After selecting product criteria, a list of applicable products appears with links to their respective Technical Data Sheets, Material Safety Data Sheets, and more. The New Product Alerts section was redesigned to permit searching by market – adhesives, coatings, composites, electronics, inks, sealants, etc. – and by publication date. There are nearly six years of New Product Alerts in the archive, which are accessible from the Web site homepage.

The enhanced site also includes a user guide, to help lead visitors to the desired information. The enhancements only affect Sartomer's Americas (www.sartomer.com) Web site. Visit www.sartomer.com/home.asp to access the latest technical information and register to receive free e-mailed New Product Alerts.

Sartomer Company, part of Total's Chemicals branch, is a U.S.-based manufacturer of specialty chemicals. Headquartered in Exton, Pa., Sartomer provides a variety of specialty chemicals designed to enhance processing and performance characteristics in coatings, inks, elastomers, adhesives, sealants, composites, and other demanding applications. The company's product offering includes more than 600 monomers and oligomers, photoinitiators, polybutadiene resins, styrene maleic anhydride resins, hydrocarbon resins, and other specialty chemicals.
