Sartomer Company Composite Literature Now Available in Japanese

Technical booklet provides formulators with useful study findings, detailed data, and more

EXTON, Pa., May 25, 2007 – Global specialty chemicals manufacturer Sartomer Company has announced that its technical literature is now available in Japanese. Volumes one and two of *Composite Concepts* are among the free, downloadable resources on the Sartomer Web site for chemists seeking to enhance physical properties of polymers, resins and esters.

Sartomer's *Composite Concepts* series covers a variety of technical topics including "Improving Composite Performance with Low-Hydroxyl Functionality Polybutadiene Resins", "Reducing Styrene Emissions with High Molecular Weight Acrylate and Methacrylate Monomers", and "Producing High-Performance Epoxies with a Unique Polybutadiene-Backboned System".

For a free copy of available Sartomer literature in Japanese, call 800-SARTOMER or 610.363.4100, or visit <http://www.sartomer.com/techlitjapan.asp>. All volumes are also available in English.

Sartomer Company, part of Total's Chemicals branch, is a U.S.-based manufacturer of specialty chemicals. Headquartered in Exton, Pa., Sartomer provides a variety of specialty chemicals designed to enhance processing and performance characteristics in coatings, inks, elastomers, adhesives, sealants, composites, and other demanding applications. The company's product offering includes more than 620 monomers and oligomers, photoinitiators, polybutadiene resins, styrene maleic anhydride resins, hydrocarbon resins, and other specialty chemicals.
